FRUIT STOCK LIST

Fall 1945

JULY 15 1945

This list cancels all previous lists.

I. E. Ilgenfritz' Sons Co.

The Monroe Nursery

Monroe, Michigan

This list is published to better serve our customers by advising them in advance regarding the actual varieties and sizes of fruit trees that are available. OK means that there is a supply available in the size so marked. SO means SOLD OUT in the particular size so indicated. When the supply is less than 100 trees in a particular size, the actual quantity available is given. (Please select an alternative variety in case the one you ordered is sold out before your order is received.) Any varieties which are not listed here have been discontinued. New lists are published, when necessary, throughout the season.

STATEMENT OF INSPECTION FOR TRUENESS TO NAME

Amherst, Massachusetts

August 1, 1945

To Whom it May Concern:

This is to state that all the salable apple pear, plum, sweet cherry, and two-year sour cherry stock now growing in the nurseries of I. E. Ilgenfritz' Sons Company, Monroe, Michigan, have been examined for trueness-to-name by A. P. French, O. C. Roberts, and L. Southwick. To the best of our knowledge and belief these trees are true to name as they now stand in the nursery rows.

The salable peach trees in this nursery were also examined and any mixtures observed were rectified. While it is impossible to positively identify all peach varieties in the nursery row, it is possible to eliminate a high percentage of the mixtures.

J. K. SHAW

Research Professor of Pomology
